Reading Comprehension

Read the following passage then answer the questions below:

Right now, I am looking at a shelf full of books, relics, old-timers and antiques. Yes, that's right. If you have some spare cash and are looking to enhance your reading experience, then I highly invite you to purchase an e-reader. E-readers are replacing the old books, and I welcome them with open arms.

An e-reader is a device that allows you to read e-books. An e-book is a book which is published in digital form, consisting of text, images, or both. It is produced on, published through, and is readable on computers or other electronic devices. The Oxford Dictionary of English defines the e-book as "an electronic version of a printed book". E-readers are superior to printed books in many aspects. One of these aspects is saving space. The average e-reader can store thousands of digital books, providing a real library at your fingertips. Moreover, being the size and weight of a thin cover, the e-reader itself is relatively petite. It is easy to hold and can fit in a pocketbook or briefcase easily.

Perhaps the only drawback to the space-saving aspect of an e-reader is that it requires you to find new things to put on your shelves. In addition, e-readers are superior to books because they are environmentally friendly. The average novel is about 300 pages long. So, if a novel is printed 1000 times, it will use 300,000 pieces of paper. That's a lot of paper! If there are about 80,000 pieces of paper in a tree, this means it takes almost 4 trees to make these 1000 books. Since e-readers use no trees, they represent a significant amount of preservation in terms of the environment and its resources.

Finally, e-readers are also superior to books because they provide helpful reading tips and tools that printed books do not. An e-reader allows its user to customize letter size, font, and line spacing. It also allows highlighting and electronic bookmarking. Furthermore, it grants users the ability to get an overview of a book and then jump to a specific location based on that overview. While these are all nice features, perhaps the most helpful of all is the ability to get dictionary definitions at the touch of a finger. On even the most basic e-reader, users can get instant definitions without having to hunt through a physical dictionary.

Choose the correct answer from a, b, c & d:

1 **The best title for the passage could be:**

- E-readers: Different Types.
- E-readers: Past. History.
- E-readers: Superiority Over Books.
- E-readers: Different Versions.

2 **The underlined word “them” in the first paragraph refers to:**

- relics
- antiques
- old books
- e-readers

3 **What does the underlined word “petite” in the second paragraph means:**

- small
- attractive
- heavy
- spacious

4 **Which of the following is TRUE about e-readers?**

- They use large amounts of paper.
- They cause harm to the environment.
- They require extra furniture in your house.
- They cannot be accustomed to users' performances.

5 **One of the disadvantages of e- readers is:**

- Replacing the old books with new ones.
- Enhancing your reading experience.
- Still not affordable to everyone.
- Saving a lot of paper.

Outline

Introduction:

Body Paragraph (1)

Body Paragraph (2)

Conclusion:

Topic

It's not difficult to see the benefits of social media, especially if you look for them. It's a great way to stay connected to friends and family, especially in the midst of the pandemic, and allows people to easily check up on one another from a distance. While there are many benefits to social media, it does have its downsides. Below are what we find to believe the biggest cons of social media.

Pros of social media are numerous, Social media isn't just about personal connections. It's also an excellent professional tool that many people can use to expand their connections, people can easily find jobs, network, and connect with potential employers. It also helps small businesses break through the noise and create direct connections with the people who are most likely to need and appreciate their services. It helps build accountability. With immediate feedback from users and viewers, people are automatically accountable for the content they post online. Negative reactions to harmful or insensitive content are hard to ignore. Brand values are also far more transparent, which means that brands are accountable for following through with the actions they've claimed they'll take part in–and their audience will pay attention to whether they follow through.

biggest cons of social media are:

- Conspiracy Theories: With the wide availability of people from a variety of backgrounds, it's easier for people with niche conspiracy ideas to develop a wide following or spread disinformation–which can make it hard for even savvy scrollers to sort the truth from the lies, especially as content creation increases.
- Addiction: Many people struggle with addiction to social media platforms and online access. They may have a hard time breaking away, even when it becomes apparent that social media involvement is having a detrimental impact on overall mental health.

In conclusion, social media is a great platform for raising awareness about a wide range of events and tasks. At the same time, however, it creates a strong risk of too much information, so we have to use social media in an appropriate way to get the best of benefits and get rid of the possible hazards.

Summary Making

Read the following passage then answer the questions below:

There are various methods to evaluate students, such as periodical tests and final exams. A teacher can notice how far his students are responsive to him. Some teachers often test their students on the spot to ensure they are on task. School activities, too, may be another evaluation area. They can practice doing things physically or mentally to show their interests, hobbies and characters. Evaluation is vital for developing the learning process and motivating students. Learning without testing could never achieve its ends, for testing reveals students' progress and evaluates methods of teaching. Therefore, evaluation aims at improving the students' level and the teachers' methods. According to students' scores, a teacher can adopt new methods to improve his students' standards.

In a paragraph of FOUR sentences ONLY, summarize and paraphrase the passage above in answer to the following question:

What are the advantages of evaluation for both students and teachers?
