Practice:

Many animals have gone extinct because of so many reasons. Men actions are well-known to be the major causes of animal extinction. Men hunt animals for their meat, skin and sometimes to sell their teeth or bones. Another thing man has been doing to cause animal extinction is the destruction of the animals' natural habitat. People have been cutting trees to create lands for farming and building. Moreover, the use of pesticides contributes to killing animals. When animals feed on the plants which pesticides were used on, they either get ill or die. Pollution plays a vital role in animal extinction as well. Although biologists have been unable to isolate a single cause for the recent rapid decline in numbers and extinctions of many species, it spears that much of it is due to pollution.

Q What are the reasons for animal extinction?

Focus On

Q The National assembly building has become a symbol of political representation within Kuwait and an important icon for Kuwaiti citizens. The building houses Kuwait's National Assembly, otherwise known as the Majlis Al-Umma or House of the nation. It is an especially important building as it houses called parliament, the only parliament in the gulf.

The building also houses the offices of Kuwait's leading politicians. Members of the public can even go to hear parliament in session and translation is available for those who don't speak Arabic. These sessions are extremely interesting for anyone who wants to learn about the governmental processes of Kuwait and reflect the open nature of Kuwait's legislative body.
