UNIT SEVEN: HAPPINESS

Reading Skills:

Q How to persuade the reader?

Q P.I.E:

Q What are the things that makes you happy?

Q Is it important to be happy?

Vocabulary

Vocabulary	Meaning	Vocabulary	Meaning
Immune	مناعي	spiritual	روحاني
material	مادي	despite	علي الرغم من
massive	كبير جدا/ ضخم	depression	مرض الاحباط
qualities	صفات		

Reading Comprehension:

Did you know that happiness is good for your health? Experiments prove that it gives you a strong **immune** system, and you recover from surgery more quickly. Some psychologists have identified three elements to happiness- experiencing the joys in life, using your strengths in a positive way and having a **spiritual** life.

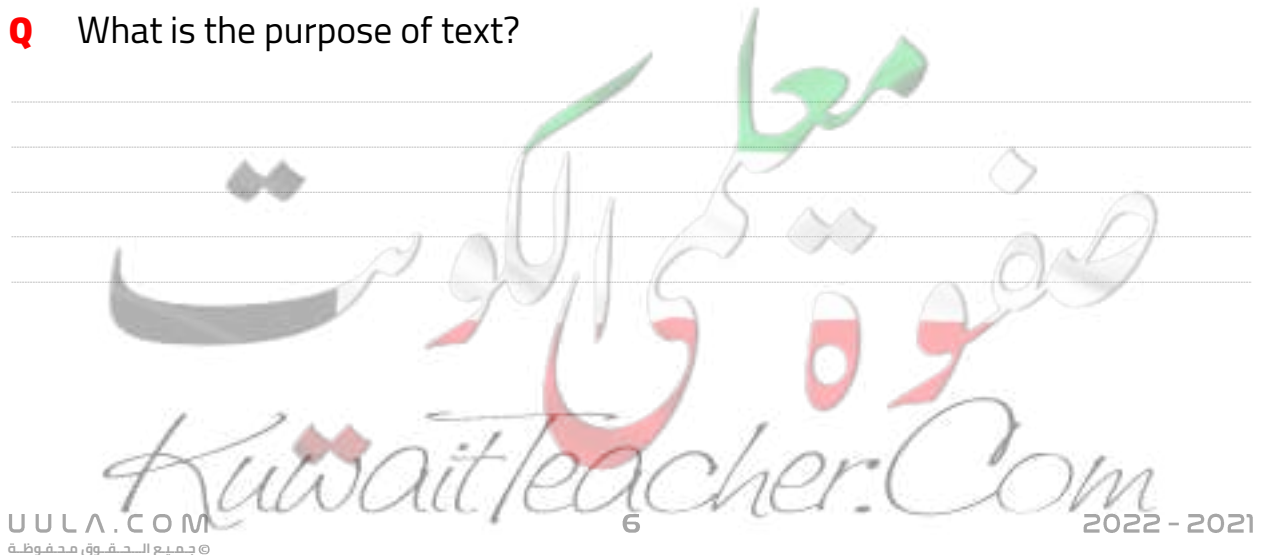

You don't need to have a lot of money to be happy, although living in poverty makes life difficult. But once you reach a reasonable level of income, more money doesn't make you happier. The **material** things that make life easier don't make us happier. The world Database of Happiness has found that people in the West have not got happier in the past 50 years, **despite massive** improvements in their standards of living.

Our thoughts also affect our happiness. If we are always thinking negatively, we will experience a negative state of mind, which leads to experiencing moments of unhappiness. The more negative thoughts you have, the longer you experience unhappiness, and sometimes even **depression**.

However, the opposite is also true. Positive thoughts can be about yourself, your success, and the things that make you happy. They can also be thoughts about other people, their good **qualities** and how they affect you positively.

The main sources of happiness are said to be family, friends, enough money, work, a social life, faith and health. The happiest people spend the least time alone and don't care about buying material things. Research has shown that if we feel happy, we also become more sociable and helpful to others. This also means we contribute more to the community.

If you are not **traditionally** a fan of **conventional** sports, but are still looking for a semi-organised physical team activity that requires strategy and endurance, then this sport is just what you need. People from all walks of life play it, both male and female. This game will have you do a ton of walking, running, climbing and jumping in order to avoid being shot at while capturing a flag.

It is a super fun activity and a great year-round hobby. It is a team sport, where the aim is to work players of the opposing team with paintballs so as to **eliminate** them from the game. Players may be **struck** on any part of the body. This sport provides healthy exercise, gets you away from TV or computer for a while, and helps you learn how to work as part of a team. It is a great game!

Q The Purpose of the previous text is to:

- ☐ Describe the tradition of paintball
- ☐ Explain the meaning of endurance
- ☐ Entertain the paintball players
- ☐ Inform about how to play paintball

Q What can be inferred about the writer's attitude towards paintball from the previous text?

- ☐ Only young people can play paintball
- ☐ It's hard to play paintball
- ☐ He likes playing paintball
- ☐ He thinks it's a physically challenging sport

Q One of the following statements about football and paintball is TRUE:

- ☐ They develop self-confidence
- ☐ They build endurance
- ☐ They emphasize the need for safety in sports
- ☐ They teach young people to play sports

Dear doctor Salem,

My personal doctors say I am overweight and that I should lose at least 10 to 15 Kgs. Unfortunately, I don't have a lot of free time. After getting back from work, I usually help my kids with their homework for 2 hours. Then I have dinner and relax a little and I read a book before going to bed. Could you please give me some advice about which exercise is best to me to lose weight?

Yours faithfully,
Ahmed

Dear doctor Salem,

Our 15-year-old daughter doesn't play any kind of team sports at school. She believes that playing sport is a waste of time if you are not the best and you don't always get the 1st place. She says that winning is the most important thing about playing sports. Instead of exercising, she spends most of her time chatting online. Her father would really like to see her make more friends and become more active.

Yours faithfully,
Fatima

Q Solution:

Dear doctor Salem,

How much exercise is too much exercise? My son exercises almost every day. He practices boxing for an hour, goes swimming for an hour and a half, and does judo every other day. That's between 10 and 16 hours every week. He has a lot of energy and looks generally healthy, but I am worried that he might push himself to extreme limits. Too much exercise may be dangerous for him. What do you think?

Best regards,
Mariam

Reading Comprehension:

Alzheimer's is a disease that causes problems with memory, thinking and behavior. **Symptoms** usually develop slowly and get worse over time, becoming severe enough to **interfere** with daily tasks. The most common early symptom of AD is difficulty remembering newly learned information.

Though it is not a **contagious** disease, it is **currently** ranked as the sixth leading cause of death in the United States, but recent studies **indicate** that it may rank third, just behind heart disease and cancer, as a cause of death for older people.

People with AD have trouble performing daily activities like driving, cooking, or paying bills. They may ask the same questions over and over, get lost easily, lose things or put **them** in strange places.

As AD advances through the brain, it leads to increasingly severe symptoms. These include confusion about events, time and place, **suspensions** about family and friends, and inability to recognize people they know. Some people become worried, angry, or violent due to mood and behavior changes and may have difficulty speaking, swallowing and walking. **Eventually**, a person with AD is likely to need full-time care.

The disease is one of the biggest **concerns** many of us have as we get older. However, promising research discovered that it may be possible to prevent or delay the symptoms of AD through a combination of simple but effective physical, mental and healthy lifestyle habits.

People who engage in **intellectual** activities and continue learning new things and challenging their brains throughout life are less likely to develop AD. You can do that by reading, playing musical instruments, or through regular social interaction. Brain teasers and strategy games such as Scrabble or Sudoku also help improve memory. So, by **maintaining** a physical, brain-healthy lifestyle, you can maximize your chances of lifelong brain health and reduce the risk of AD which has been one of our biggest health concerns.

Q Find information from the text to complete the diagram:

Q The purpose of the text is to

- ☐ talk about the discovery of the disease.
- ☐ complain about Alzheimer's disease.
- ☐ inform us about Alzheimer's disease.
- ☐ compare Alzheimer's to another disease.

Q According to the article, the following statements are true except:

- ☐ The symptoms of AD increase by time.
- ☐ AD is the second leading cause of death.
- ☐ Unhealthy lifestyle could develop the symptoms.
- ☐ Patients with AD don't always recognize their relatives.

UNIT TEN: ANIMAL INTELLIGENCE

Q Are you familiar with any intelligent animals?

Q Which animal would you pick to raise as a pet?

Lesson: Reading Comprehension:

Ants, small and unnoticed by many, have proven to be intelligent and highly organized creatures. Ants are the most organized **species** on Earth. They have **thrived** for millions of years on every continent and in every environment, except for Antarctica. Ants can be found in **scorching** deserts, forests, and cities. They exhibit a **supreme** form of intelligence and **perseverance**, building cities, farms, communicating, and accomplishing tasks through a highly efficient behaviour. Unfortunately, perhaps because ants are tiny, most people consider their advanced intellect as instinct.

To a great extent, ants cooperate closely with each other to perform daily functions. They are highly organized and work well in groups. Ants are able to move large objects and even cut down trees through **collective** effort, just like the skillful workers who built the pyramids by moving **giant** blocks.

Research has **demonstrated** ants can pass on knowledge to one another and teach each other how to search for food. Ants use a technique known as (tandem running) in which one ant directs another to food. In this way, ants locate food faster than they would have on their own. No doubt, ants are advanced species that share our community-planning methods. When we learn more about them, we will develop an even greater respect for them.

Overcoming health challenges

Professor Stephen William Hawking is a world-famous physicist and brilliant scientist. He was born on the 8th of January in 1942. When he was 17 years old, he received a **scholarship** to study Physics and Chemistry at Oxford University. He got a Bachelor’s degree in 1962 and then moved to Cambridge to study **Cosmology**.

Diagnosed with Motor Neuron Disease, which led him to suffer from muscle weakness, at the age of 21, Hawking became sad and almost stopped his studies. However, influenced by his wife – Jane Wilde, he returned to his academic life and got his PhD in 1965. Hawking is perhaps best known for his pioneering theories on black holes and his bestselling 1988 book A Brief History of Time. Despite his undoubted intelligence, Hawking was modest about his gifts. When asked in a 2004 interview with The New York Times what his IQ was, Hawking gave this reply: “I have no idea.” **World-renowned** Stephen Hawking, seen by many as the world’s smartest person, never revealed his IQ score.

A competitive woman

Dr. Manahel Thabet is an **economist** driven by deep feeling. Dr. Thabet is the youngest economist in the world and an Arab graduate with a PhD degree in Financial Engineering. Dr. Thabet's research has also been included in the Financial Engineering Society Research focusing on knowledge-based economy. The research made achievements in the finance research studies.

In 2012, Thabet improved a **formula** that measures distance in space without the use of light. The formula was **groundbreaking** in the field of quantum mathematics (A new science of money) and is 350 pages of numbers. Her work to **revolutionize** our understanding of Math and Physics led her to get a second PhD in Quantum Mathematics. Moreover, she was selected to be in the World Genius Directory representing Asia for 2013. She says that her IQ is over 168, from a Stanford-Binet test. Also, she was **ranked** among the most influential 100 Arab Women by the CEO Magazine and among the most powerful 500 Arabs in the world.

achieve	يحقق / ينجز	goal	هدف
traits	سمات/صفات	relatively	نسبيا / تقريبا
due to	بسبب	abundance	كثرة
increased	متزايد	advances	تطورات

Reading Comprehension:

Artificial Intelligence (AI) is the ability of machines to think, learn and imitate the way human beings act. They are called “smart” machines because they can work on their own. The ideal characteristic of AI is its ability to take action that may **achieve** a specific **goal**. The term can be applied to any machine, which has **traits** associated with the human mind, like learning and problem solving.

Some examples of machines with artificial intelligence include computers that play chess, which have been around for years, and self-driving cars, which are **relatively** new. In chess, the end result is winning the game. For self-driving cars, the computer system must consider all external data and act in a way to help prevent accidents. Ten years ago, if you mentioned the term “artificial intelligence” people would probably laugh at you. Today, AI technology is a great support to the digital information taking place today.

So how has this change come about? Well, it is partly **due to** the **abundance** of data. This has led to more research into ways data can be processed, analyzed and acted upon. Machines are more suitable to do this work than humans. They are trained to do this in the “smartest” way possible. This **increased** interest in research in the field that led to **advances** that are leading to big changes. From computers to self-driving cars, no one is laughing now!
