Introduction to Unit 1

It is possible to describe law as the set of rules that governs a society and controls the behaviour of its members, so Law is a formal mechanism of social control.

Law can be said to perform three different functions, each of which is of huge importance to our welfare. **First**, it defends us from evil. **Second**, it resolves disputes and disagreements among people to let them live in peace and harmony. **Third**, it protects minorities from abuse as it protects individuals' rights.

Kuwaiti laws are made to protect the individual rights. Kuwait has a well-structured and clearly defined judiciary, composed of summary, military and religious courts. The Emir, in consultation with the Justice Ministry, appoints judges in the regular courts. The law is drawn from the teachings of the Holy Qur'an and protects the rights of all people of all religious persuasions, ensuring a safe, just and tolerant society

There are three types of laws. The first one is the **Criminal Law** which deals with crimes like murder and theft. The second type is the **Family Law** which deals with family affairs like marriage, divorce and adoption. The third type of law is the **Civil Law** which deals with problems between neighbours and the behavior of large companies. **In addition**, there is another type, the **Property Law**, which governs the form of ownership.

An area of law which is changing very quickly in the modern world, is the law related to **computer crime**. Computer with Internet connection can also be used more safely by criminals than face-to-face meetings. **Computer Crimes** are more difficult to solve than traditional crimes because criminals are **invisible** and their actions may be impossible to prove. Nowadays, computer crime is on the increase because the number of people using the Internet to buy things is increasing.

In conclusion, it is very clear that law carries out a number of functions that are of great importance in a society. Law defends us and encourages people to do what is right in the society.

Reading Comprehension (110 Marks)

Read the following passage carefully, then answer the questions below:

1. Clarence Lundberg's thought he would never stop smoking. After all, wouldn't quitting smoking after 45 years be impossible? Clarence started smoking when he was only 12 years old, and got used to waking up in the morning and starting his day with a cup of coffee and a cigarette.

2. So why did Clarence decide to take the big step toward quitting tobacco? "It all started in 2011, when I went to the doctor for a regular check-up. I was lucky to be asked if I wanted to take part in a lung test program, and this is when I was diagnosed with chronic disease," he said. "I was concerned when the research doctor told me I could continue to keep smoking, but I would need an oxygen tank next to the bed in a year or two. That's something my wife, would definitely not find attractive."

3. Clarence is a success story. Through the Smoking Cessation Program, he has now been smoke-free for over a year and a half. "When the doctor told me I was facing a future with an oxygen tank, I tried to quit smoking straight away. And I did quit, but I realized I needed more support and help when I relapsed and began smoking again. I took steps to quit with the Smoking Cessation Program and used the nicotine patches and the coaching programs. I liked the patches in particular, as they took away my craving for a morning cigarette."

4. The future looks brighter and clearer for Clarence, who experienced a multitude of benefits once he stopped smoking. He used to wake up in the morning with a persistent cough, sometimes coughing for over five minutes straight. "Before I quit smoking, I wouldn't have believed how much healthier I could feel. My circulation got much better—my hands and feet have colour and are warm instead of white and cold. I don't have an oxygen tank next to the bed and my morning cough is gone. I have much better energy in the morning, and I can easily swim 2,000 metres and close to 20 metres under water."

I- Choose the correct answer from a, b, c and d: (5 x 10 = 50 M)

1- What is the text mainly about?

- vainly tried to quit a 45-year smoking experience.
- willingly gave up smoking thanks to a doctor's support.
- was determined enough to voluntarily quit smoking.

Summary Making

Leaving home and traveling to study in a new country can be a stressful experience, even though it may be something you have planned and prepared for. Many people are surprised when they experience the impact of culture shock, and it can be helpful to realize your experience is actually quite normal.

While there is no magic cure for student shock, colleges have started to recognize the problem and are starting a number of ways to help. Most colleges have upgraded their psychological counselling centres to handle the greater demand for services. In addition, many schools are improving their vocational counselling services by giving students information about possible majors and career choices. In some colleges, first-year students are required to attend major career workshops as part of the advising process. Sometimes, colleges train senior students to detect such problems and offer the needed help at the right time.

In about four sentences of your own, mention the different ways adopted by schools and colleges to solve the problem of student shock.

Unit 2 Migration

Quote

"There are no foreign lands. It is the traveler only who is foreign."

Robert Lousis Stevenson.

Introduction to Unit 2

Migration is the movement by humans from one place to another. It is sometimes done over long distances outside the country or within the same country. People can either choose to move (voluntary migration) or be forced to move (involuntary migration).

Migration can be classified into two types. The first one is the Internal Migration; Moving to a new home within the same country. The second type is the External Migration; Moving to a new home in a different country. People migrate for different reasons. Some migrate seeking better life conditions. Others migrate looking for better jobs. In some cases, people migrate to escape starvation or to escape wars. Furthermore, some people migrate for better education.

Migration has its own advantages and disadvantages. As for the advantages; people can learn other cultures, traditions and other languages. Furthermore, they can get well paid jobs and enjoy better lifestyle. On the other hand, there is an opposite side of migration. Some people might find difficulties coping with new cultures. Others might lose their identity, feel homesick and lonely.

Animals and birds as well as humans have their reasons to migrate. They migrate looking for better living conditions, finding a warmer place, feeding their young and looking for a better shelter. Animals migrate using the earth's magnetic field. They also use landmarks like mountains or by using the sun and the stars.

To sum up, migration as well as many other aspects of life has two faces, one good and one bad. We need to learn both faces so as to make the right decision whether to migrate or not.

Summary Making

In about four sentences of your own, mention how you can save water in your daily life.

There are 11 organ systems in your body that function interdependently. Most of us have plenty of water for our daily needs, maybe even an excess. Regardless of our seeming abundance of this resource, it is still important to use water carefully. You can save water in your daily life and be an example for others of good water stewardship by washing dishes by hand and not allowing the water to run while rinsing. Fill one sink with wash water and the other (or a plastic tub) with rinse water. You can also soak pots and pans instead of letting the water run while you scrape the dishes clean. In addition, try to install an instant water heater near your kitchen sink so you don't have to run the water while it heats up. This also reduces energy costs.

VI- Reading Comprehension

Read the following passage and answer the questions below:

Research suggests that walking may not make you a genius but it will improve your attention and concentration and help your mood, well-being and even your physical health.

Regular physical exercise such as walking has been shown to help improve both mental and physical health. Certainly, the many physical health benefits of regular exercise are well known and researched. Ongoing regular exercise can improve heart performance, lead to more weight loss, and boost metabolism, the process by which the body changes food into energy. Research has found that regular exercise lowers anxiety, depression, stress and concentration.

Yet, even with all these wonderful benefits of regular exercise, the vast majority do not meet even minimal recommended amount of exercise. There are a variety of reasons for this lack of exercise including time pressures and lack of commitment to do so. This is one reason why walking is such an important exercise for most people.

Many may not afford the time energy and money to join a health club or gym or perhaps participate in exercise activities that are harder to do. Many sports, which are skill based, may result in injury, and cost a lot of money. Walking is perfect since you can do **it** anywhere and at any time and it does not need special equipment. Most of us can do walk and must find a way to make that happen.

One helpful way to improve walking is to always wear a pedometer, an instrument that calculates the distance travelled on foot by recording the number of steps taken. They provide feedback on your walking progress and most professionals suggest aiming for 10,000 steps per day. This translates into about 8 km of walking. A pedometer is a great motivator since it gives you an accurate description of your exercise activity .Walking may be long or short but as long as you keep your body, you will **accumulate** more steps. Therefore, you'll likely notice that your thinking is clearer , you are more attentive, happier, and you'll lose some weight and have a good shape.

Introduction to Unit 3 Human values

Human values are the principles that guide our life. They are human beliefs. They are part of our culture. Some examples of human values are; Compassion, Respect, Tolerance, Empathy, and Freedom. They are part and parcel of our life. Without these values, our life would be chaos.

The question is: **Why do we need these values?** The answer is so easy, simply; because values reduce violence and let people live in peace. They decrease problems among people and help them solve their problems cordially away from courts and lengthy litigations. Acquiring such values allow people understand each other and live a warm and peaceful life. They help build up our personalities to be in the right frame.

Islam teaches us about human values through the stories in the Holy Qura'an and through the prophets' sayings. There are many stories in the Holy Qura'an that shed the light on the importance of human values.

Finally, all human actions will become dangerous if they are not guided and highlighted by human values. As I see, we need to know more about these values, learn them and teach them to our kids, and I am sure the whole community will gain the benefits later on.

Reading Comprehension**Read the following passage carefully then answer the questions below:**

9 o'clock on Wednesday evening. All is suspiciously quiet in my 15-year-old daughter Laurie's normally noisy room. My youngest daughter, aged 11, comes downstairs and says her sister is on Facebook.

With her final exams now just weeks away, I am getting desperate. I call Laurie and beg her to **disable** her Facebook account. "Dad, I can't do it," she says. Of course, I could take matters into my own hands, take away her laptop and shut down our wireless connection at night, but I have strived to trust my children. What really concerns me isn't the stuff she is posting on her page, it's the worrying amount of time she spends logged on Facebook.

I am convinced that my daughter's techno-habit has turned her from a bright, well-read student to someone who stays up late, can't concentrate and will probably fail her exams. But this was partly our fault. We gave her a laptop and an unlimited access to the Internet, stupidly thinking that this would help her with her studies.

Discovering Laurie's habit was very disappointing and saddening because I had always presumed that Facebook was for the sad and the lonely- not for someone gifted with fully-formed social skills. Where she sees a useful communication tool, I see a mind-numbing, childish way of passing precious time. It requires constant commitment and gets you into trouble, too. As for her school work! Her grades have slipped dramatically and her teachers complain about her lack of application and concentration.

If I confront her, she flatly refuses to blame the Internet. However, I am doing my best to wean Laurie **off Facebook** because it has adversely affected her life and school performance.

A) Choose the correct answer from a, b, c and d:

1- Circle the most appropriate title

- a- Facebook is very useful for my daughter's study
- b- Facebook is ruining my daughter's future
- c- Facebook is giving my daughter fantastic opportunities
- d- Facebook is the best communication tool

2- "To wean Laurie "off Facebook" (parag.5) means.....

- a- to encourage Laurie to use Facebook
- b- to make Laurie stop using Facebook
- c- to oblige Laurie to use Facebook
- d- to ask Laurie to control her Facebook logging time.

3- All of the sentences below are FALSE except.....

- a- Simon and his daughter share the same opinion about Facebook.
- b- Teachers don't care about Laurie's results.
- c- Laurie refuses to blame the Internet.
- d- The parents share no responsibility for Laurie's Facebook addiction.

4- The word "disable" in (parag. 2) means.....

- a- deactivate
- b- activate
- c- share
- d- fail

5- The main idea of paragraph 3 is.....

a- the advantages of facebook

b- the writer is blaming himself

b- the reasons of staying up later

d- the daughter became a facebook addicted

B- With reference to the passage, answer the following questions:

6- Pick out 3 consequences of Laurie’s Facebook addiction.

7- What really concerns Laurie’s father?

8- What are the father’s opinions about Facebook?

9- Discovering Laurie’s habit was very disappointing because.....

Summary Making

I'm surprised that you seem to find no fault at all with computers. I quite agree with you that they are excellent means of entertainment and a valuable source of information. But you seem to forget that they have also become a source of addiction to many children. A lot of mothers nowadays complain about the fact that their children have become so obsessed with their computers and the Internet that they lose contact with their friends and so grow lonely. Besides, their health is affected as they spend long hours sitting in front of the screen. Their eyes hurt and their backs ache. In addition to that they become less performing at school because of this time consuming activity. They don' find time to do their homework well or to do some reading. Apart from that using the Internet for a long time may lead to the impoverishment of young pupil's language skills because the language used on the Internet is not only full of mistakes but it often consists of abbreviations and unfinished sentences , which doesn't help young people to improve their learning.

In a paragraph of FOUR sentences ONLY , summarise and paraphrase the previous passage in an answer to the following question:

Why are some mothers against the overuse of computers by children?

Unit 4 Desertification

"Treat the earth well .It was not given to you by your parents, it was loaned to you by your children."

Desertification is the process in which productive land changes into desert. It is usually found in dry places, in harsh climate and in hot weather. It is caused by a variety of factors, such as climate change and human activities. Man cut down trees to make more land for farms. Man overgrazed animals and over cultivated his land which of course led to desertification.

Desertification is becoming a huge problem. Land becomes dry and dusty because wind and rain wash away the top layer of the soil which makes it difficult to grow crops. The soil becomes completely useless. Increasing human population and poverty contribute to desertification as poor people may be forced to overuse their land without the ability to plan for the long term effects of their actions.

As I see, we need to halt desertification and this can be done if the number of animals on the land is reduced, allowing plants to regrow. Also, we must stop cutting trees. Another solution to increase farm areas is to take land from the sea and marshes.

Quote
 "Water which is too pure has no fish"
 Quote
 "Water is the only drink for a wise man."

Water**"Today's rain water is tomorrow's life saver."**

Water is the backbone of people's, animals' and plants' existence. Our bodies are made up of about 1/3 of water. Water is important because it is an absolute necessity for all living things! Not only do we need it inside our bodies to stay alive, but there are so many animals that actually live in the water. Not to mention, most beings can go quite a while

without food, but none can go more than 3 to 5 days without water!

Despite this, still some people waste water. They turn on taps while brushing or shaving. They do not fix pipes' leaks. They waste water while bathing, washing cars using hoses. All these methods cause water shortage.

Here comes the question; how can we save water for the future and for generations to come? There are many ways we can save water and still get all of our day-to-day tasks completed; we just need to make a few changes in our water usage. We can use modern system of farming. We must fix old pipes. Also, we can Turn off taps when no need for them. We can take these few steps that will significantly decrease our water usage.

As I see , we can also hold programmes and seminars to let people aware of the importance of water.

Unit 5 Recycling

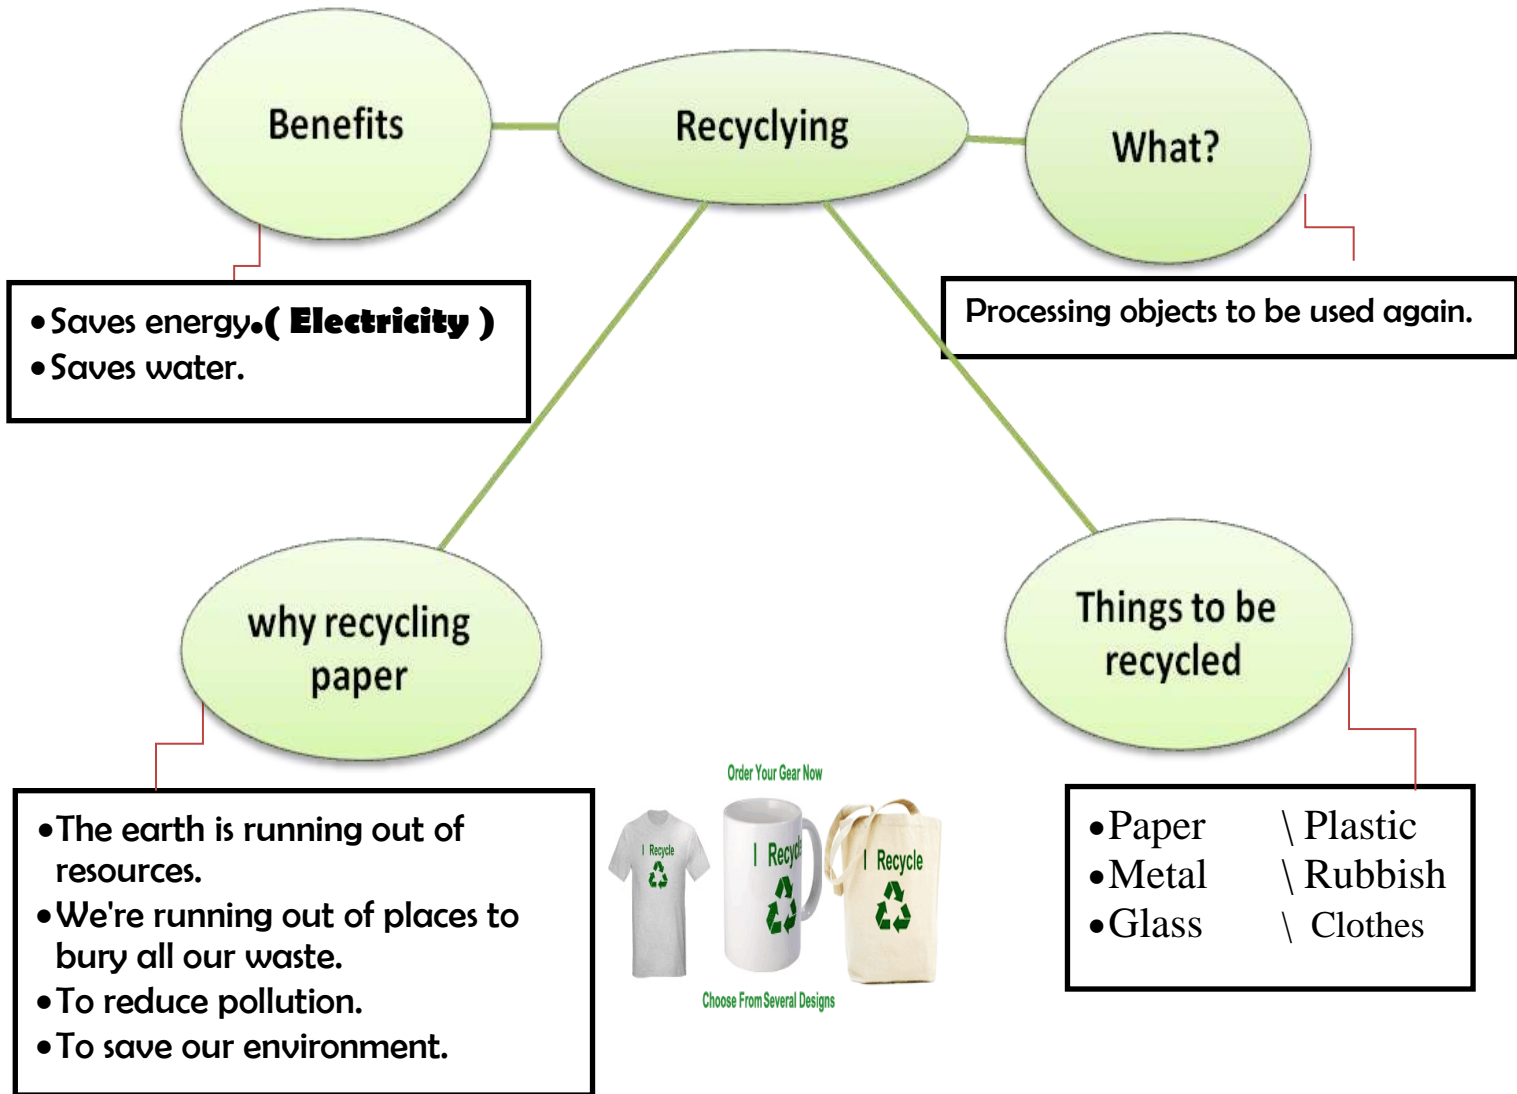

**"Everything in life can be recycled,
but our deeds."**

Recycling is one of the best ways to have a positive impact on the world in which we live. Recycling is very important and useful to both the natural environment and us. We must act quickly and as fast as the amount of waste we create. The amount of rubbish we create is increasing enormously.

Does it make sense to recycle? The short answer is yes. Recycling is very important as waste has a huge negative impact on the natural environment. Harmful chemicals and greenhouse gasses are released from rubbish in landfill sites. Recycling helps to reduce the pollution caused by waste. Recycling requires much less energy and therefore helps to preserve natural resources. Many things can be easily recycled. We can recycle paper, rubbish, plastic, cloth, glass and metals.

It is now clear that it makes sense to reuse products, and to reduce energy altogether, as well as to save the environment.

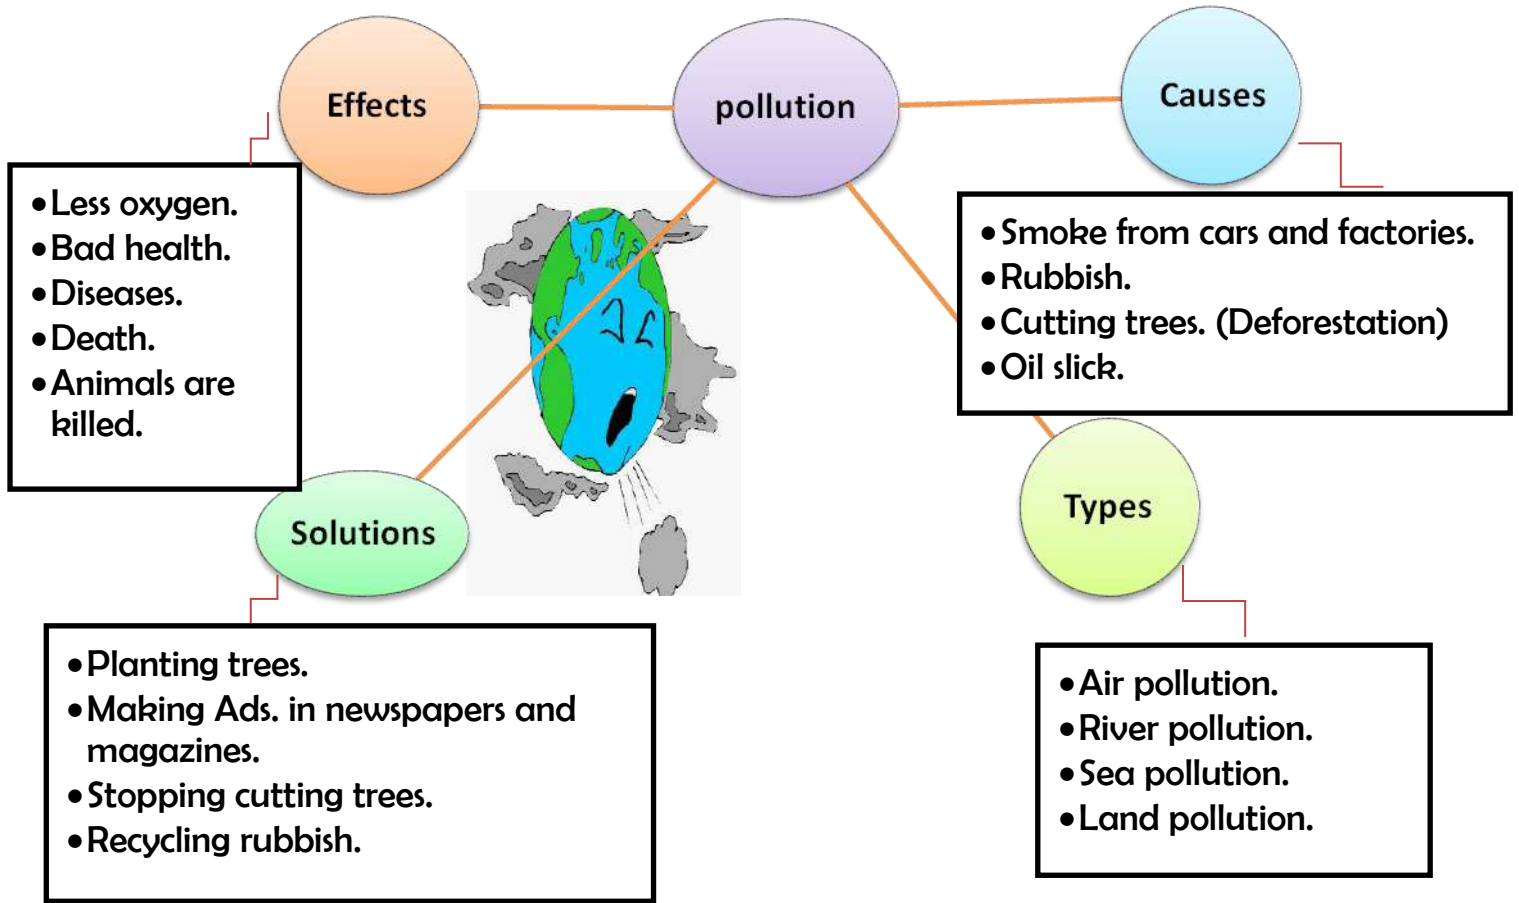

"Everything can be recycled, but our deeds."

Introduction to Unit 6

The extinction of animals

Extinction is when an animal species no longer lives on the Earth. Extinction is nothing new, but what is new are some of the reasons the Earth is now losing more animals, at a faster rate than it is believed ever before in Earth's history.

There are many reasons animals become extinct. One of the most common reason is loss of habitat. The Earth constantly changes, but human activity is having a *devastating effect on animals by destroying many of the places animals live, like the rain forests. In some cases animals become extinct because the food they depend on becomes extinct causing the animals to die of starvation.

Pollution is another cause of extinction. Human activity is releasing harmful chemicals into the air, water and soil all over the planet. Many animals cannot adapt to the changes these chemicals are making in the environment and they die.

A giant panda is an example of animals which are becoming extinct due to extensive habitat loss and destruction by hunters. Pandas are in danger because they are being killed daily by either humans or animals, hence their numbers are decreasing.

Finally, we should act immediately to stop animals from being extinct. We can build reservations for them. We can impose strict roles to stop hunting them.

The arguments for or against land reclamations

“The land is the only thing in the world worth working for, worth fighting for, worth dying for, because it's the only thing that lasts”

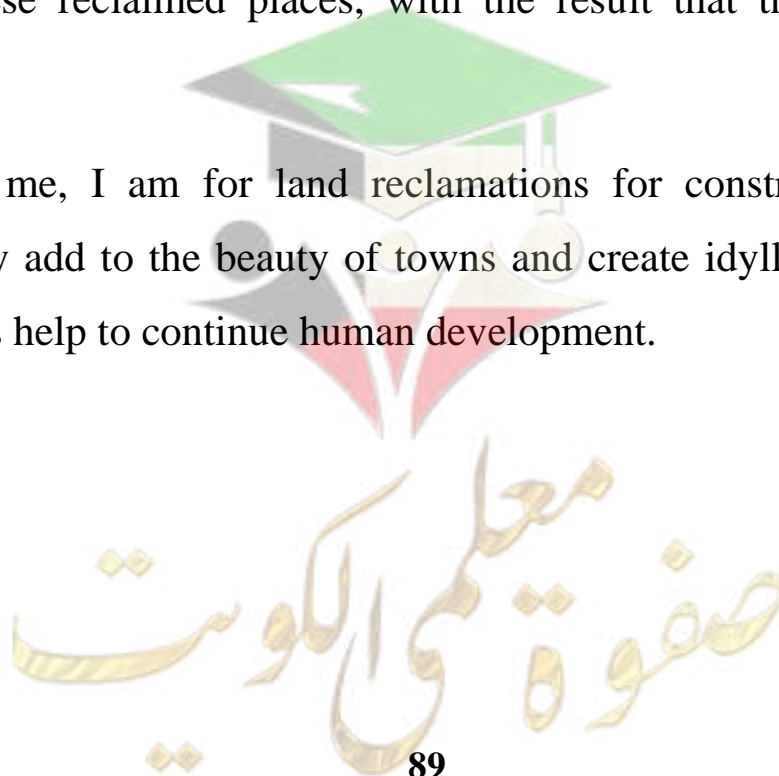

of their arguments.

Land reclamation means taking land from the sea and marshes for farming, housing and building modern buildings. Many people are for utilizing waste land for the sake of reclamations but an equal number of these people are against. Let's go to some

People who are for state that utilizing undeveloped wetlands for construction purposes in the town will increase demand for services. Many companies can take part in the construction purposes. Furthermore, it will help the town to expand and modernize. Two good examples are The Palm Islands in the UAE and SouK Sharg in Kuwait.

On the other hand, people who are against fear that rare types of birds will lose their natural habitat. In addition, it increases competition for local businesses. Also, a great number of people will move to live and to work in these reclaimed places, with the result that the place will be crowded.

As for me, I am for land reclamations for constructing purposes because they add to the beauty of towns and create idyllic setting. These new projects help to continue human development.

Reading Comprehension

A. Read the following passage carefully, then answer the questions below:

1- Early marriage might mean taking a decision to settle down early in life. Early marriage, or child marriage, is defined as the marriage or union between two people in which one or both parties are younger than 18 years of age. Some Parents see marriage as a cultural custom that protects their daughters. Parents often feel that a young girl is an economic burden. At times, early marriage is a matter of choice and at times by force. There are some advantages and some disadvantages that can help you reconsider your decision.

2- Biologists have found that marrying later in life causes psychological problems and might result in giving birth to less intelligent children whereas early marriage has many pros such as helping to give birth to more intelligent children who live longer as well as preventing the couple from diseases. It becomes evident now why Prophet Mohammad, PBUH, advised young people of early marriage; He said: "Oh young people whoever of you is capable of marriage should marry." Young mind is easier to adaptability and sustenance. As the mind grows old, it becomes difficult for both parents to deal with their kids. For women, an early marriage is safer in terms of pregnancy. According to health care practitioners, 25 is the ideal age for pregnancy in women. Furthermore, early marriage gives more time for couples to pursue **their** career comfortably and plan a child soon after.

3- On the other hand, there is a darker side of being married so early. Those who marry early miss out on the fun of teenage life and being young. They are deprived of their youth. Breakdown of marriage is possible. Often the young couple is immature to shoulder major responsibility and end up fighting with each other. In addition, Education also gets affected. The young couple may not be able to pursue higher education as they have to take on the responsibilities of family budget. Since their education levels are low, they cannot get highly paid jobs. Bringing up children may be difficult, as well. Their knowledge of child care may be limited and parental guidance is also not there. They may not be able to provide the appropriate care for their child.

4- All in all it is clear that marrying early may seem very romantic and **convenient**, but it has its problems. Couples need to get to know each other better and this takes time. Rushing into a marriage, which may not last long does not appear the right thing to do.

A-From a, b, c and d choose the correct answer: (5 x 10 =50 Marks)**28. What is the main idea of paragraph (3)?**

- The advantages of early marriage
- The disadvantages of early marriage
- The Prophet Mohammad, PBUH recommendations concerning early marriage

- a. women
- b. biologists
- c. children
- d. couples

30. What is the OPPOSITE of the underlined word 'convenient' in paragraph (2)?

- a. appropriate
- b. inappropriate
- c. useful
- d. suitable

31. We can understand from the passage that the author wants to:

- a. inform us that young couples can't carry the responsibility of marriage
- b. advice parents to let their sons and daughters marry early
- c. to show the importance of marriage
- d. discuss the pros and cons of early marriage

32. All the following statements are true EXCEPT One :

- a. Some parents consider early marriage a habit
- b. Women can give healthy birth at the age of eighteen
- c. couples shouldn't hurry seeking marriage
- d. young couples don't have long experience to settle their problems

B) Answer the following questions: (4x15= 60 Marks)

33. Why can't young married couples offer the required carefulness for their kids?

34. less education results in.....

35. Some old couples are unable to deal with their kids, why?

36. What is the best thing to do concerning marriage from the writers prospective?

VII- Summary Making

(60 Marks) Read the following passage carefully, then answer the question below:

Whether a movie is a rotten tomato or a brilliant work of art, if people are watching it, it's worth criticizing. A decent movie review should entertain, persuade and inform, providing an original opinion without giving away too much of the plot. A great movie review can be a work of art in its own right. To write a review you should acquire some skills. You should start with a personal opinion on the movie. You want to get the reader hooked immediately. Is it good, great, terrible, or just okay? In addition, it is advisable to take notes during the movie really pays off. No one cares about your opinion if you can't give facts that support your argument. Furthermore, you should gather basic facts about the movie. You can do this before or after you watch the movie. You have to be fair enough and judge the quality not the quantity. Finally, it is not an easy task to write a film review, it needs a lot of training.

In FOUR sentences, summarise and paraphrase the previous passage in answer to the following question: (4X15=60M)

What skills are needed to make a good film review?
