

The human brains and supercomputers

Throughout history, people have compared the human brain to different inventions. These days, the brain is compared to supercomputers. There are some differences between human brain and computer. Human brain has the ability to be creative. It learns how to manage different skills during life. It is fast in learning new things and has the ability to make decisions. Supercomputer can do many complex tasks at the same time. The time needed to teach the system is long.

There are many ways to activate children's intelligence. Reading helps to improve language which is necessary for communication. Playing with blocks, memory games and puzzles activate their minds. Doing math exercises and physical activities are very important. Believe in them and praise their efforts to develop a growth-mind set.
