A **prefix** is a little word added in front of a word to change its meaning.

There are hundreds of prefixes, some of the most popular are: **il** - **ir** - **im**, these change the words to the opposite meaning.

When you add a prefix you don't change the root word (just add the prefix):

**ir** + responsible = irresponsible

\* use **il** before words starting with **l**.

\* use **ir** before words starting with **r**.

\* use **im** before words starting with **m**, **p** and **b**.

However, like all rules there are exceptions: **unless** – **unreal** – **unmarried**...

4 a. Write the correct prefix of each word in the following table:

<b>ir</b>	regular	<b>irregular</b>

<b>ir</b>	resistible	<b>irresistible</b>
<b>im</b>	balance	<b>imbalance</b>

Traditional print publishing problems are easily transferred to online forms of communication. (Because/Therefore/If) we need new methods to help us in measuring the accuracy and reliability of online sources. (If/However/In addition) some traditional evaluative skills may need to be applied more strictly to web resources. (For Example/Because/Both) human error has always been possible in traditional print publishing. Combine the following.

Swim + ing = **swimming** Cut + ing = **cutting** fat + est = **fattest**
