### **Reading Comprehension (60)**

### Read the following passage carefully, then answer the questions below:

60

When we are young, we learn that tigers and sharks are dangerous animals. We might be scared of them because they are big and powerful. As we get older, however, we learn that sometimes the most dangerous creatures are the smallest ones. In fact, the creature that kills the most people every year is the mosquito. Male mosquitoes eat plant nectar. On the other hand, female mosquitoes feed on animal blood. They need this blood to live and produce eggs. When a female mosquito bites a human being, it transmits a small amount of \*saliva into the blood. This saliva may or may not contain a deadly disease. The result of the bite can be as minor as an itchy bump or serious as death.

Because a mosquito can bite many people in the course of its life, it can carry diseases from one person to another very easily. Two of the most deadly diseases carried by mosquitoes are malaria and yellow fever. More than 700 million people become sick from these diseases every year. At least 2 million of these people will die from these diseases. Many scientists are working on safer and better ways to kill mosquitoes, but so far, there is no sure way to protect everyone in the world from their deadly bites.

Mosquito nets can be placed over beds to protect people against being bitten. These nets help people stay safe at night, but **they** do not kill any mosquitoes. Mosquitoes have many natural enemies like bats, birds, and certain kinds of fish. Bringing more of these creatures into places where mosquitoes live might help to **cut down** the amount of mosquitoes in that area. This is a natural solution. Mosquitoes can be killed with poisons or sprays. Even though these sprays kill mosquitoes, they may also harm other plants or animals. Although mosquitoes may not seem as scary as powerful animals, they are far more dangerous to human beings. But things are changing. It is highly likely that one day scientists will find a way to keep everyone safe from mosquitoes and the diseases they carry.

\* Saliva = the watery liquid that forms in the mouth and helps to chew and digest food

| A. From a, b, c and d choose the right an   | swer: (4 X 10 = 40)         |  |  |  |  |
|---|-----------------------------|--|--|--|--|
| 1. The main idea of the passage is about.   |                             |  |  |  |  |
| a. being scared of dangerous animals. b. the course of life of mosquitoes. c. mosquitoes as the most dangerous creatures to human beings. d. keeping people safe from mosquitoes.   |                             |  |  |  |  |
| 2. Based on the passage, we can understand that   |                             |  |  |  |  |
| <ul><li>a. poisons and sprays are the safest protection against mosquitoes.</li><li>b. scientists have found ways to keep us safe from mosquitoes.</li><li>c. the more people a mosquito bites, the easier diseases are transmitted.</li><li>d. mosquito nets can help mosquitoes produce eggs.</li></ul> |                             |  |  |  |  |
| 3.The underlined word <u>cut down</u> means   |                             |  |  |  |  |
| <ul><li>a. to transmit</li><li>c. to protect</li></ul>  | b. to produce d. to reduce. |  |  |  |  |
| 4. The underlined word they in paragraph 3 refers to  |                             |  |  |  |  |
| <ul> <li>a. natural enemies</li> <li>b. mosquito nets</li> <li>c. poisons or sprays</li> <li>d. dangerous animals</li> </ul>  |                             |  |  |  |  |
| B. Answer the following questions: $(2 \times 5 = 10)$  |                             |  |  |  |  |
| <b>6.</b> Why is a mosquito bite so harmful?  |                             |  |  |  |  |
| 7. What is the natural solution to combat mosquitoes the writer suggests?   |                             |  |  |  |  |
| Summary Making (10)   |                             |  |  |  |  |
| With reference to the first paragraph and in not less than 4 sentences of your own,   |                             |  |  |  |  |
| write down why the writer says that the most dangerous creatures are the smallest ones.   |                             |  |  |  |  |
|   |                             |  |  |  |  |
|   |                             |  |  |  |  |
|   |                             |  |  |  |  |
| 1 / 1   |                             |  |  |  |  |
