Read the following pa	ussage, then answer the questions below:	Un-		

You have got something that is more **<u>complicated</u>** than the most powerful computer in the world. With this thing you can experience the sight and smell of a flower, the memory of holiday, the pain when you hit your thumb with a hammer, the sound of your favourite singer, your thoughts and ideas. All these are possible because of a kilo of cells in your skull: the brain.

Your brain controls everything you do. It receives information from your senses about conditions inside your body and outside <u>it</u>. Your brain analyses this information with amazing speed and sends out messages that control your body. For example, when you put your hand in very hot water, you think "Oh! That hurts!" and you pull your hand from the water. This is what happens in your brain. Your hand sends a message to your brain: "Very hot!" and your brain immediately sends a message to your hand: "Take your hand out."

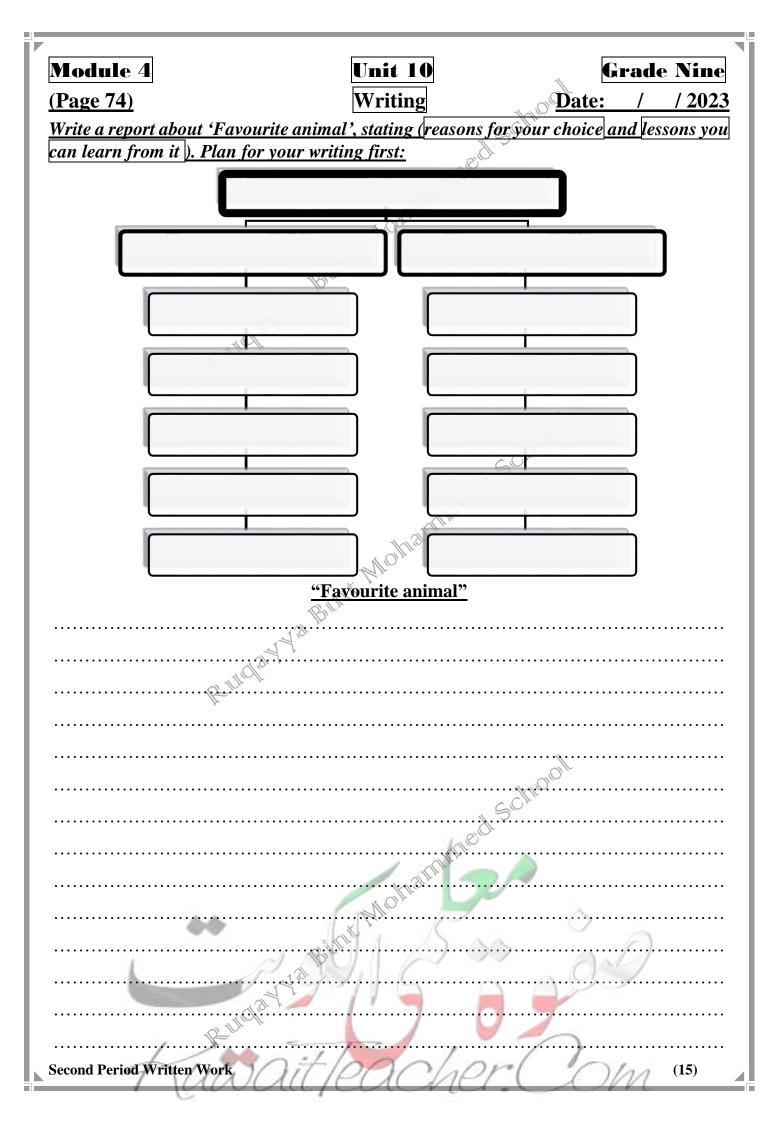

Your brain also stores memories of things that happened to you in the past and this makes remembering easy. Finally, your brain controls your lungs, heartbeat, body temperature and the actions of your stomach.

Read the following pas	ssage, then do as required below:	Opro				

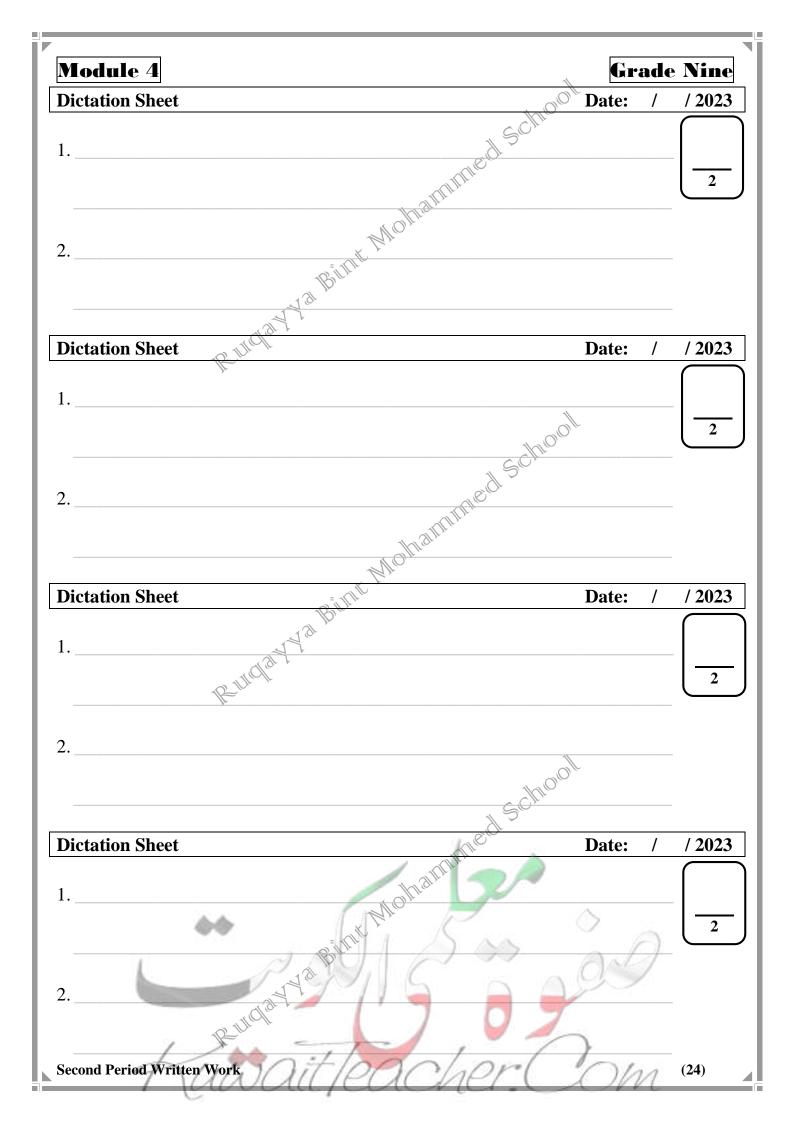

Ahmed has a big family. He felt bored. He did not want to follow his father's instructions. One day, he thought that he could live alone in his own world. He believed in that for just one reason: he is an adult now. He could do everything on his own. He could overcome all the problems without any help. He did not know well the importance of living among nice family members. He was really mistaken to take the decision of living alone although sometimes we need moments of loneliness. Times of warm family **gatherings** are important to everyone.

Ahmed's best friend is Ali who loves being among his family members. When Ahmed told his friend Ali about the matter, he advised him not to do it. He added that he could find comfort among his family members, <u>which</u> is really a great treasure. Besides, our families aid and support us in both difficult times and happy ones more than anyone in the world. Really, we cannot always live alone. People complete each other in such a big world. A friend in need is a friend indeed. It is a good behavior to support each other.
