B- Reading Comprehension (16 marks)

16

Read the following passage carefully, then answer the questions below:

Should parents worry about what television and video are doing to their children?! Are they making them fatter and lazier? It's said that videos and televisions were responsible for losing interest in reading among the young. While they may be harmless in themselves, they do nothing to build up reading skills. If some of the hours children spend watching television were spent in reading, **they** would be better learners.

Watching a story is not an ideal hobby because someone else has made the decisions about everything in it. Reading a story is an active link between the writer and the reader. Ideas are written by the writers and the mind of the reader creates the rest.

The problem is that many children read very slowly. They read a page or two in a class and about the same again for homework. It is not surprising that such children say that reading is **boring** and prefer to watch television. They need to be able to read fast enough to feed the mind's hunger for a story. That means practice. Only by reading daily in a relaxing atmosphere will make the child a better reader.
