Read the following text carefully, then answer the questions below:

A zoo is a place where animals are housed, cared for, shown to people. A zoo usually has animals that are from other countries and natures. They are used to teach people about animals around the world. Zoos give the chance for animals to be cared for and protected. The first **modern** zoo was opened in Paris in 1793. The first zoo was simply used to show off as many animals as possible. The animals lived in small cages and people did not care very well for the animal's health.

Today, zoos put the care and health of the animals first. Zoos are also used as research centres, meaning that the animals and the nature that they live in are studied carefully. They help us to know more about animals from the world and how they live. Zoos have programmes to save rare animals from death. They keep **them** in a safe environment in the zoo. They give food and care for the rare animals to help them become more in number.
