Read the following passage carefully, then answer the questions below:

It is easy to make a delicious-looking hamburger at home. But would this hamburger still look delicious after it sat on your kitchen table under very bright lights for six or seven hours? If someone took a picture or made a video of this hamburger after the seventh hour, would anyone want to eat it? More importantly, do you think you could get millions of people to pay money for this hamburger?

These are the questions that fast-food companies worry about when **they** produce commercials or print ads for their products. Video and photo shoots often last many hours. The lights that the photographers use can be extremely hot. These conditions can cause the food to look quite unpleasant to potential consumers. Because of this, the menu items that you see in fast food commercials are probably not actually edible.

Let's use the hamburger as an example. The first step towards building the perfect commercial hamburger is the bun. The food stylist—a person employed by the company to make sure the products look perfect—sorts through hundreds of buns until he or she finds one with no wrinkles. Next, the stylist carefully rearranges the sesame seeds on the bun using glue and tweezers for maximum visual appeal. The bun is then sprayed with a waterproofing solution so that it will not get **soggy** from contact with other ingredients, the lights, or the humidity in the room. Next, the food stylist shapes a meat patty into a perfect circle. Only the outside of the meat gets cooked—the inside is left raw so that the meat remains moist. The food stylist then paints the outside of the meat patty with a mixture of oil, molasses, and brown food coloring. Grill marks are either painted on or seared into the meat using hot metal skewers. Finally, the food stylist searches through dozens of tomatoes and heads of lettuce to find the best-looking produce. One leaf of the crispest lettuce and one centre slice of the reddest tomato are selected and then sprayed with glycerine to keep them looking fresh.

So, the next time you see a hamburger in a fast-food commercial, you must remember that you're looking at glue, paint, raw meat, and glycerine! Are you still hungry?

A. From a, b, c and d choose the correct answer:

1. Which of the following would be the **best title** of the passage?
 - a) The Food Stylist
 - b) Bright Lights & Humidity
 - c) How to Take Photos
 - d) **Fast Food Commercials**

GRADE 12- UNIT SEVEN: READING COMPREHENSION

- a) **wet**
 - b) ugly
 - c) attractive
 - d) tasteless
3. What does the underlined word ‘**they**’ in the 2nd paragraph refer to?
- a) questions
 - b) millions of people
 - c) commercials
 - d) **fast food companies**
4. According to the passage, the food stylist’s job is to:
- a) **make food products look perfect.**
 - b) make the most delicious products.
 - c) cook tasty hamburgers.
 - d) cook the inside and outside of the bun.
5. According to the passage, which of the following is **NOT TRUE**?
- a) **It takes a few hours to shoot photos to produce a commercial.**
 - b) The sesame seeds are carefully rearranged by the stylist on the bun.
 - c) The meat will remain moist only if the inside of the meat is left raw.
 - d) Glycerine is used to make the lettuce leaf and tomato slice look fresh.

B. With reference to the passage, answer the following questions:

6. Why are the menu items that you see in fast food commercials not edible?
Because video and photo shoots often last many hours. / The lights that the photographers use can be extremely hot.
7. Why is the bun sprayed with a waterproofing solution?
The bun is sprayed so that it will not get soggy from contact with other ingredients, the lights, or the humidity in the room.
8. Why does the food stylist only cook the outside of the meat?
The inside is left raw so that the meat remains moist.
9. How are the grill marks made on the fast-food commercial?
Grill marks are either painted on the outside of the meat patty with a mixture of oil, molasses, and brown food colouring, or seared into the meat using hot metal skewers.

GRADE 12- UNIT SEVEN: SUMMARY MAKING

Read the following passage, then do as required:

Festivals are gatherings and activities to express joy at a remembered event. As societies change, the characteristics of their traditional festivals and celebrations may also change; new ones often appear as others diminish. Most likely, however, some festivals will remain unaltered for generations. First, for participants they are a source of joy. For observers they offer an unforgettable experience. Secondly, festivals in old societies provided a chance for the elders to pass on folk knowledge to younger generations. Moreover, modern festivals, centring on the customs of a nation, enrich the understanding of one's heritage. Finally, contemporary festivals aid the local economy by attracting visitors. Certainly, celebrations are part of the lifestyle of all people and contribute to modern civilization.

In a paragraph of FOUR sentences ONLY, summarise and paraphrase the passage above in answer to the following question:

What are the benefits of Festivals?

- Read the following passage carefully, then answer the questions that follow:

Everyone has a favourite attraction at an amusement park, and I am no different. However, unlike most people who seem to prefer rollercoasters, my favourite ride is a little more gentle. Every time I go to Coney Island, Navy Pier, or the Santa Monica Pier, I absolutely have to ride the Ferris wheel. The Ferris wheel is simple and yet also quite complex. That is, riding it is easy, but how it works is complicated. A series of carts are attached to a wheel, which is attached to a rim. That rim rotates vertically around an axis, and gravity keeps the carts upright. As simple as the ride seems, only advanced engineers can make safe and fun Ferris wheels.

While the Ferris wheel is not as thrilling as a rollercoaster, it is still very exciting. The fact of being high in the air makes it so much more entertaining than a lot of rides. Nevertheless, I have to admit, I don't seek Ferris wheels out because of their excitement. Rather, I find them very relaxing. At the top of the Ferris wheel, you get beautiful sights of the park. You also get a sense of calm that you don't get in the hustle and bustle of the park below. Additionally, Ferris wheels are also gorgeous to look at when they are lit up at night. In fact, the original Ferris wheel was designed as much to be seen as to be ridden.

The first Ferris wheel was made by George Washington Gale Ferris. He designed it for the Chicago World's Fair in 1893. It was the tallest attraction there, standing 264 feet high. However, visitors to the fair were impressed by the size of the ride as well as the mechanics of it. Further, as one visitor put it, the Ferris wheel was amazing because it seemed to be missing support. That is, it did not look like it could stand on its own. And yet it did and even rotated!

Ferris wheel technology has only **improved** since then. Most of today's Ferris wheels are much larger than that first one. The largest in the world is the "Singapore Flyer," which stands slightly taller than twice what Ferris's did! Today, the Ferris wheel is the most common amusement park ride. But that does not mean you should take them for granted. Instead, be thankful for Ferris' invention. The next time you're at an amusement park, don't just look up at the impressive wheel in the sky on your way to a newer attraction. Take it for a spin!

From a, b, c and d choose the correct answer:

1. The best title for the passage could be:

- a) Chicago World's Fair
- b) **Ferris Wheel, a Relaxing Ride**
- c) The Thrill of a Roller Coaster

4. The purpose of the writer is to:
- a) **explain the history of Ferris wheels and why he likes them.**
 - b) persuade the readers to ride the thrilling rollercoaster.
 - c) inform the readers about Chicago World Fair exhibits.
 - d) entertain the reader with a story about Singapore Flyer.
5. Which of the following words best describes the writer's feelings when he rides Ferris Wheel?
- a) thrilled
 - b) excited
 - c) **relaxed**
 - d) terrified

B) With reference to the passage, answer the following questions:

6. According to the **2nd paragraph**, when are Ferris wheels gorgeous to look at?
Ferris wheels are gorgeous to look at when they are lit up at night.
7. Why does the writer describe The Ferris Wheel as "quite complex"?
Because how it works is complicated.
8. What does the writer enjoy doing at the top of The Ferris Wheel?
Getting beautiful sights of the park.
9. How does the Singapore Flyer differ from the first Ferris Wheel?
The "Singapore Flyer" is taller and larger.

Read the following passage carefully, then do as required:

Winter is cold in some places. Animals get through this time in many ways. First, birds and butterflies fly away. They go to a place with nice weather and come home in the spring. Migrating is a good way to avoid the cold. Another good way to avoid the cold is to sleep through it. Many animals hide during the winter. They do not eat. They live off their fat. We call this hibernation. In addition, some animals store food in their homes. They live on what they saved in the summer and fall. Finally, to survive, other animals grow thicker coats in the winter or change colours. Winter may be pretty. It is nice to see snow on trees, but it is dangerous, too.

In a paragraph of FOUR sentences ONLY, summarise and paraphrase the passage above in answer to the following question.

How do some animals survive cold winter?

Read the following passage carefully, then answer the questions below:

Doctors say that there are several kinds of headaches. Each kind begins in a different place and needs different treatment. Some of these headaches start with a change in vision or sight. The person sees wavy lines, black dots, or white spots in front of the eyes. This is a warning that a headache is coming. The headache occurs on only one side of the head. The vision is blurred, and the person may vomit from the pain. These headaches are called the migraine headaches. They are more frequent in women than men. Sleep is the best cure for **them**.

Cluster headaches, which also start in the arteries, are called cluster headaches because they come in clusters or groups. A cluster headache lasts only for two hours and then goes away. At the beginning of the cluster headache, the eyes become red and watery. There is a steady pain in the head. Men have more cluster headaches than women do.

The muscle headache, which starts in the muscles in the neck or forehead, is caused by tension. When the person becomes nervous about something, or has problems at work, school or home, the neck and head muscles become tense and the headache starts. A muscle headache usually starts in the morning and gets worse as the hours pass. There is a steady pain, pressure and a bursting feeling. Usually, Aspirin doesn't help in muscle headaches.

How do doctors treat headaches? If a person has frequent headaches, the doctor first has to decide what kind they are. Medicine can help, but there are other ways to treat them. The doctor asks the patient to analyse his or her daily living patterns. A change in diet or an increase in exercise might stop the headaches. If the patient realises that difficulties at home, work or school are causing the tension, it might be possible to make changes and decrease these problems.

Psychological problems and even medicine for another physical problem can cause headache. The doctor has to discuss and **analyse** all these patterns of the patient's life. A headache can also be a signal of a more serious problem, so, patients should realize that there is no magic cure for headaches. However, doctors can control most of them.

A- From a, b, c and d choose the correct answer:

8. What should a person do if he/she has frequent headaches?
- He/ she should consult a doctor to decide what kind they are and then receive the suitable treatment/cure.**
9. How do doctors diagnose the various types of headaches?
- Doctors ask the patient to analyse his or her daily living patterns, determine the type of headache, physical or psychological, then give the suitable cure.**

**Read the following text then do as required:**

The frightening outbreak of Coronavirus has become the most important topic that occupies the entire world. The virus that causes COVID-19 is spreading very easily among people. Thus, the more closely a person interacts with others, the higher the risk of COVID-19 spread will be. The World Health Organization, WHO, has developed measures for protecting workers from exposure to SARS-CoV-2, the virus that causes COVID-19, which depend on the type of work being performed, exposure risk, and the interaction with the infected people. For all people not only workers, first of all, it is good to frequently wash hands with soap and water for at least 20 seconds. Also, when soap and running water are unavailable, an alcohol-based hand rub with at least 60% alcohol can be used. Besides, it is a must to avoid touching eyes, nose, or mouth with unwashed hands. Finally, It is important to avoid close contact with people who are sick and stay home if one feels sick.

In a paragraph of FOUR sentences ONLY, summarise and paraphrase the previous text in answer to the following question:

What preventive measures should be taken during the COVID-19 pandemic?

GRADE 12- UNIT TEN: EXPOSITORY WRITING

Topic (100 Marks)

Exposition of ideas and coherence	Paragraphing and number of sentences	spelling	grammar	Hw, spacing and punctuation	Total
60	10	10	10	10	100

Read the following passage carefully, then answer the questions below:

From far out in space, the Earth looks like a blue ball. Since water covers three-fourths of the Earth's surface, blue is the colour we see most. The continents look brown, like small islands floating in the huge, blue sea. White clouds wrap around the Earth like a light blanket. The Earth is shaped like a sphere, or a ball. It is 25,000 miles around! It would take more than a year to walk around the whole planet. A spaceship can fly around the widest part of the sphere in only 90 minutes.

The Sun is the closest star to Earth. A star is a hot ball of burning gas. The Sun looks very big because it is so close. But the Sun is just a medium-sized star. Billions of far-away stars are much bigger than our Sun. The burning gases from the Sun are so hot that they warm the Earth from 93 million miles away! Even though the Sun is always glowing, the night here on Earth is dark. That's because the Earth **rotates** every 24 hours. During the day, the Earth faces the Sun. Then we see light. During the night, the Earth turns away from the Sun. Then it faces the darkness of space.

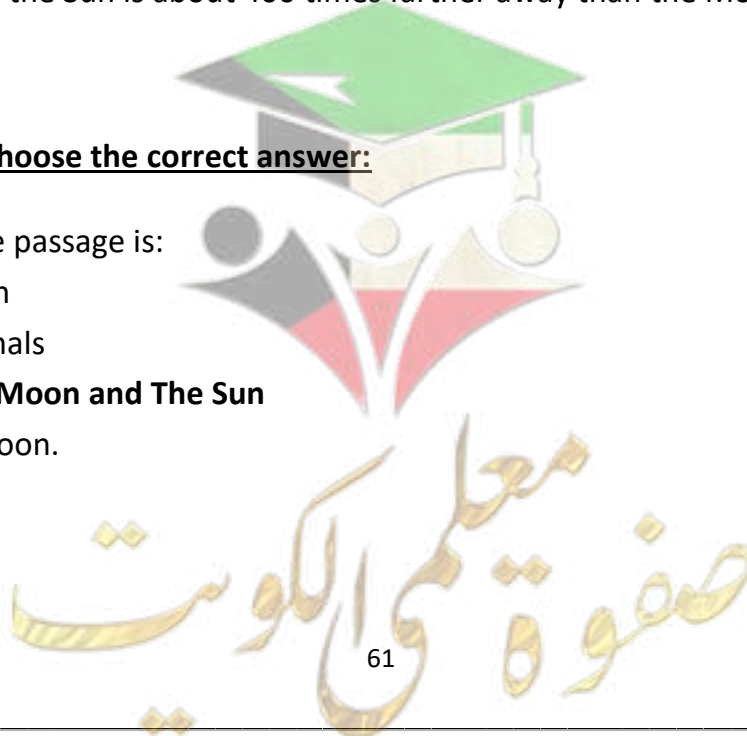

Although spaceships have travelled to the Moon, people cannot visit the Moon without special suits. The Moon has no air or water so plants and animals can't live there. Astronauts first landed on the Moon in 1969. **They** brought back Moon rocks, which scientists are still studying. There are holes all over the Moon's surface. Scientists believe that huge pieces of rocks crashed into the Moon millions of years ago and formed the holes.

The Sun warms our planet, and with the Moon, creates the tides in seas and oceans. The Moon orbits the Earth and in turn, the Earth orbits the Sun. The Sun and the Moon appear to be the same size in the sky because the Sun is about 400 times farther away than the Moon.

A- From a, b, c and c choose the correct answer:

1. The best title for the passage is:

- a) Without the Sun
- b) Plants and Animals
- c) **The Earth, The Moon and The Sun**
- d) Living on the Moon.

GRADE 12- UNIT TEN: READING COMPREHENSION

2. The underlined word "rotates" in the 2nd paragraph is closest in meaning to :
- a) goes away
 - b) **turns around**
 - c) arrives at
 - d) travels to
3. The underlined word "They" in the 3rd paragraph refers to:
- a) animals
 - b) plants
 - c) **astronauts**
 - d) spaceships
4. The astronauts brought rocks back from the Moon:
- a) **to learn more about the Moon.**
 - b) to remember how the Moon looked.
 - c) to form holes on the moon.
 - d) to create the tides in seas and oceans.
5. According to the passage, all the following sentences are **NOT TRUE EXCEPT**:
- a) The Sun is a very big star.
 - b) During the night, the Earth faces the Sun.
 - c) **Both the Sun and the Moon create the tides.**
 - d) The burning gases from the Sun cool the Earth.

B- With reference to the passage, answer the following questions:

6. Why can't people visit the Moon without special suits?
Because the Moon has no air.
7. How could the writer explain the phenomenon of having light and dark on Earth?
The Earth rotates every 24 hours. During the day, the Earth faces the Sun. Then we see light. During the night, the Earth turns away from the Sun. Then it faces the darkness of space.
8. How long does it take to walk around the Earth?
It would take more than a year to walk around the whole planet.
9. Why do the Sun and the Moon appear to be the same size in the sky?
Because the Sun is about 400 times farther away than the Moon.

Read the following passage, then do as required:

Wearing seat belts does not make you invincible. You can still get hurt or killed while wearing your seat belt. But wearing them has proven first to be safer than driving without them. Second, you are much less likely to be killed in a car wreck if you are wearing a seat belt. Third, you are much less likely to get seriously injured if you are wearing one. Finally, you can save your life and the life of others who join you on a journey. So why not take the safer way? Why not go the way that has been proven to result in fewer deaths? You do want to live, don't you?

In a paragraph of FOUR sentences ONLY, summarise and paraphrase the passage above in answer to the following question:

What are the benefits of wearing seat belts?

Read the following passage carefully, then answer the questions below:

How many things can you see in the night sky? On a clear night you might see the Moon, some planets, and thousands of sparkling stars. You can see even more with a telescope. You might see stars where before you only saw dark space. With bigger and better telescopes, you can see more and more objects in the sky. And you can see those objects in more and more detail.

But scientists believe that there are some things in the sky that we will never see even with the biggest telescope in the world. That is because they are invisible and **mysterious**. They are dead stars which are called black holes. You might find it hard to imagine that stars die. After all, our Sun is a star. Year after year we see it up in the sky, burning brightly, giving us heat and light. The Sun certainly doesn't seem to be getting old or weak. But stars do burn out and die after billions of years.

As a star's gases burn, they give off light and heat. But when the gas runs out, the star stops burning and begins to die. As the star cools, the outer layers of the star pull in toward the centre. The star squashes into a smaller and smaller ball. If the star is very small, it ends up as a cold, dark ball called a black dwarf. If the star is very big, **it** becomes lesser and lesser until it's packed together tighter than anything else in the universe.

Imagine if the Earth were crushed until it was the size of a tiny marble. That's how tightly this dead star, a black hole, is packed. What pulls the star in toward its centre with such power? It's the same force that pulls you down when you jump – the force called gravity. A black hole is so tightly packed that its gravity sucks in everything, even light. The light from a black hole can never come back to your eyes. That's why you see nothing but blackness. So, the next time you stare up at the night sky, remember: There's more in the sky than meets the eye!

From a, b, c and d, choose the correct answer:

1. The best title for the passage is:

- a) **Black Holes**
- b) The Burning Sun
- c) The Force of Gravity
- d) The Tiny Marble

2. The underlined word "**it**" in the 3rd paragraph refers to:

4. The black hole doesn't reflect light because:

- a) The star is giving off heat and light when its gases burn.
- b) The layers of a star are pulled outwards when it cools.
- c) Most black holes are very far from the Earth.
- d) **The gravity of the black hole pulls the light inside it.**

5. The writer's purpose in writing this test is to:

- a) show how importance to use bigger telescopes
- b) entertain us with a story about the sparkling stars.
- c) inform the reader how the sun produces heat and light.
- d) **make people aware of the unknown objects in the sky.**

B) With reference to the passage, answer the following questions:

6. “There's more in the sky than meets the eye!” What does the writer mean?

The light from a black hole can never come back to your eyes. That's why you see nothing but blackness.

7. How many things can you see in the night sky?

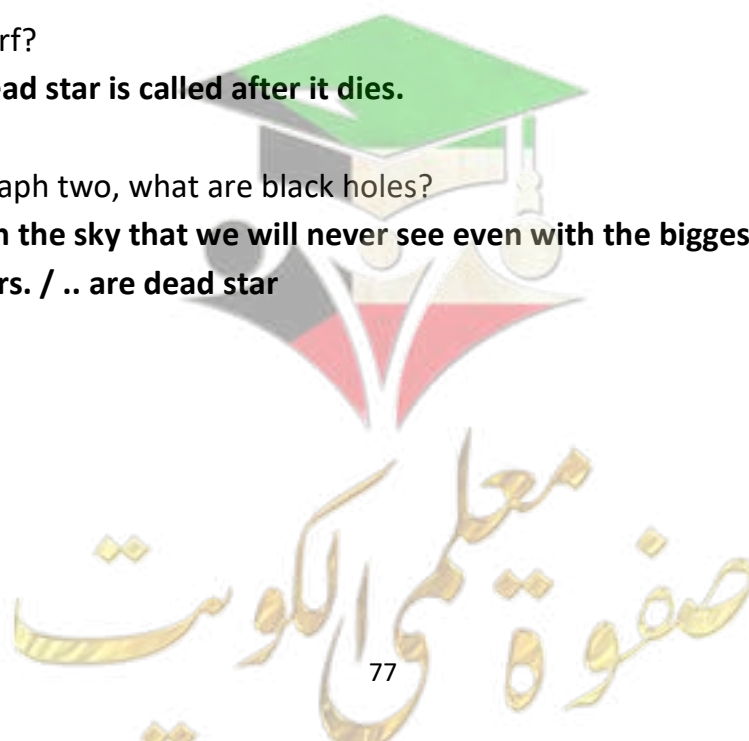

The moon, some planets, and thousands of stars.

8. What is a black dwarf?

9. According to paragraph two, what are black holes?

They some things in the sky that we will never see even with the biggest ./ ... are invisible and mysterious stars. / .. are dead star

GRADE 12- UNIT ELEVEN: SUMMARY MAKING

Read the following passage, then do as required:

Writing is one of the most important inventions of humanity. It allows us to record our history, ideas, and discoveries. As writing developed, so did writing tools. First, the early cavemen used brushes made from animal hair to paint pictures on cave walls. The pictures usually told stories about their hunts. After several centuries, the Egyptians invented a simple kind of pen made of reed, which is a tall plant like grass. Later, the Chinese used metal tools to carve their characters into turtle shells and cattle bones. After many decades, people developed different writing tools such as fountain pens and ballpoint pens with tiny ink tanks in them. Only time will tell what writing tools our children and grandchildren will be using in the future.

In a paragraph of FOUR sentences ONLY, summarise and paraphrase the passage above in answer to the following question:

How have the writing tools developed throughout history?

Read the following passage carefully, then answer the questions that follow:

Called the 'Red Planet', Mars is roughly half the size of Earth, and one of our closest neighbouring planets. Though Mars is the most Earth-like of any other planet, the two are still greatly different.

Living on Mars has been the stuff of science fiction for decades. However, can humans really live on Mars? Will it ever be possible or safe? NASA (the National Aeronautics and Space Administration) hopes to find out. NASA researchers on Earth are conducting several experiments together with the International Space Station (ISS) to study the health and safety issues that may tell us if life on Mars is possible.

Food and oxygen would be the main necessities for travellers living long periods on Mars. The need to grow plants, which provide both food and oxygen, would be the key. Compared to Earth, the decreased gravity and low atmospheric pressure of Mars will stress the plants and make **them** hard to grow.

However, space station crews are growing plants in controlled environments in two of the station's greenhouses. They take care of the plants, photograph them, and collect samples to be sent back to Earth. Researchers then use the data to develop new techniques that will make it possible to grow plants successfully in space.

Another concern for space travellers is the health hazards caused by the effect of space radiation on humans. A spacecraft travelling to Mars would be exposed to large amounts of radiation. Since human exposure to such **intense** radiation would mean certain death, the spacecraft used for such travel would have to protect the humans on the inside of the craft from exposure.

Researchers are using special machines **inside** the crews' areas of the International Space Station to carefully watch radiation levels. **NASA scientists**, who have maintained radiation data since the beginning of human space flight, **continue to learn** about the dangers it causes.

Will it ever be safe for humans to live on Mars? It is still too early to say. But thanks to the dedicated researchers of NASA and the results of ISS experiments, we are getting closer to knowing every day.

A- From a, b, c and d, choose the correct answer:

1. Which of the following would be the best title of the passage?
 - a. The Dangers of Radiation
 - b. Can Plants Grow on Mars?
 - c. **Life on Mars: Possible or Impossible**
 - d. Experiments on the International Space Station

GRADE 12- UNIT TWELVE: READING COMPREHENSION

2. The underlined word '**intense**' in the **5th** paragraph is closest in meaning to:
 - a. **strong**
 - b. normal
 - c. recorded
 - d. controlled
3. What does the underlined word '**them**' in the **3rd** paragraph refer to?
 - a. **plants**
 - b. periods
 - c. travellers
 - d. necessities
4. One of the following statements could be **understood** from the **3rd** paragraph:
 - a. Mars' gravity helps plants to grow.
 - b. Earth's gravity is weaker than Mars'.
 - c. **Earth's gravity is stronger than Mars'.**
 - d. Mars' gravity is as strong as the Earth's.
5. Which of the following is **NOT TRUE** about the plant experiments on the ISS?
 - a. Scientists photograph plants.
 - b. **Plants are exposed to radiation.**
 - c. Scientists send samples back to Earth.
 - d. Plants are being grown in greenhouses.

B- With reference to the passage, answer the following questions:

6. How big is Mars in comparison with Earth?
Mars is roughly half the size of Earth. / Earth is twice as big as Mars.
7. What would be the two main necessities for human life on Mars?
Food and oxygen would be the two main necessities.
8. According to paragraph **4**, why do space station crews grow plants in a controlled environment on Mars?
To develop new techniques that will make it possible to grow plants in space./ Researchers grow plants in a controlled environment on Mars to collect data about the plants./ To help the researchers find possible ways to grow plants successfully in space.
9. How do researchers on the ISS carefully watch radiation levels?
They use special machines inside the crew area of the ISS.

Read the following passage, then do as required:

Many people catch a cold in the springtime. When the virus attacks your body, your body works hard to get rid of it. First, blood rushes to your nose and brings congestion with it. You feel terrible because you can't breathe well, but your body is actually "eating" the virus. Then, your temperature rises, and you get a fever, but the heat of your body is killing the virus. In addition, you get a runny nose to stop the virus from getting to your cells. You also may experience sore muscles as your immune system attacks foreign invaders. Luckily, your body has its ways to fight off cold and get you back to health.

In a paragraph of FOUR sentences ONLY, summarize and paraphrase the passage above in answer to the following question:

How does the human body get rid of viruses?

VI- READING COMPREHENSION (110 Marks)

Read the following passage carefully, then answer the questions that follow:

One of the biggest and most expensive transportation projects in the world is bridge building. Bridges are important links that carry cars, trucks and trains across bodies of water, mountains or other roads. As a result, **they** have to be strong so that they won't fall or collapse.

Bridge collapses can be tragic events, leading to loss of life and serious property damage. That's why bridge engineers, designers and builders must always take their jobs very seriously. The best way for them to prevent these accidents is to understand why bridges collapse in the first place. Understanding bridge collapses can lead to major changes in the design, construction and safety of future building projects.

There are many reasons why bridges fall which can be either due to their design or to external factors. Historically, more bridges were made of wood and were much more sensitive to fire. This was particularly true of old train bridges that would sometimes catch fire and burn to the ground. Besides, a large number of bridge accidents occur during the construction of the bridge itself. These accidents are often due to an error made by the engineers, such as a miscalculation. The bridge collapses under its own weight, and this can be deadly for the workers on it at the time. Additionally, earthquakes damage all structures, including bridges. Luckily, this kind of collapse is relatively **infrequent**, especially with modern bridges. Engineers have learned to design bridges in earthquake zones on areas that are much more resistant to movement. Moreover, some bridge collapses are mysteries, and engineers only realise the reasons after they do a complete research. In some cases, this could happen because low-quality material was used in the construction, or because of a problem in an important part of the bridge. In other cases, the bridge was designed only to support a certain amount of weight and no more.

As for external factors bridge collapses can be due to boat or train crashes. Both kinds of accidents are extremely rare, but boats and trains can cause a bridge to collapse for different reasons. With trains, it's the high speed that can bring a bridge down. With boats, it's the heavy weight that can cause the collapse, even if **they are moving** very slowly when the crash happens.

The best way to avoid bridge failures is to **plan for them**. Modern technologies that can detect structural weakness, safer working environments and better designs can all help to reduce these terrible accidents.

From a, b, c and d choose the correct answer: (5 X 10 = 50 Marks)

- Because bridge collapses can be tragic events, leading to loss of life and serious property damage.**
35. How could engineers avoid a bridge collapse due to earthquakes?
- Engineers have learned to design bridges in earthquake zones on areas that are much more resistant to movement.**
36. How can modern technology help reduce bridge accidents?
- Modern technologies can detect structural weakness, safer working environments and better designs.**

VII - SUMMARY MAKING (60 Marks)

Read the following passage, then do as required:

It is hard to know where to start when beginning strength training. There are countless exercises that you can do. Some work with certain body types while others don't. With some familiarity of the basics, you can begin to craft a routine to achieve your personal goals.

Strength training should be part of your workout routine due to its numerous benefits. One benefit is building muscles and improving bone density. In addition, strength training increases the strength of ligaments and joint functioning. It can also help raise good cholesterol levels and lower blood sugar levels. Most people like strength training because of its most obvious benefit which is having a slimmer appearance.

In a paragraph of FOUR sentences ONLY, summarise and paraphrase the previous passage in answer to the following question: (60 Marks)
